Forecast for Sunday 04 Jun 2023

Weather: Early morning cloud possible on eastern hills, along with some limited valley mist or fog patches. This soon clearing however, to leave a sunny day with light easterly winds. Perhaps some fair weather cloud developing during the afternoon, but remaining well above the tops. Very High UV levels.

Chance of cloud-free hill tops above 600m: Near 100%, but 80% in the east early morning.

Low Cloud and visibility: Some patches of cloud possible on eastern hills above 400m, and poor views also possible with any early morning mist or fog patches in the valleys. This soon clearing through the morning, leaving a largely cloud free day with very good to excellent views of distant hills.

Freezing Level*	1900m	2100m	2200m	2200m	2200m	2200m	2200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite temperatures near normal or only just above for June, the strong sunshine will lead to it feeling warm with only a little relief from the breeze. Appropriate sun-protection, along with plenty of water will be essential.

Recent rainfall: measured at Malham: altitude 375m
